MY PROJECTS

Harbourbit

A journaling web app with features such as calendar tracking, sentiment analysis chart, a streak counter and JWT authentication

Technologies used : Reactjs, zustand, framer-motion for frontend.

DrizzleORM, NeonDB(postgres), expressjs, nodejs, for backend

github : <https://github.com/Heel2Toe/Harbourbit>

<https://github.com/Heel2Toe/HarbourbitApi>

live-website : <https://harbourbit.vercel.app/>

Simon Game

An old fashioned pattern memorising game with leaderboards and firebase auth.

Technologies used : Nextjs, typescript, firebase, zustand

github : <https://github.com/Heel2Toe/simon-game>

live-website : <https://simon-game-niranjana-pn.vercel.app/>

Blogger

A dynamic blog website featuring user-rated and commented blogs, with premium user functionality. A topic manager role for blog approval/rejection. An admin role for managing topic managers and website.

Technologies used : Nodejs, Expressjs, ejs, mongodb, mongoose

github : <https://github.com/Heel2Toe/blogProject-niranjana>
